Tactex gains new customers

Tactex reported that it has completed deliveries of bed occupancy sensors to several new customers. Tactex's bed occupancy sensors are used in long-term-care facilities for fall prevention and management of wandering residents. According to Tactex President and CEO David Lokhorst, "We sell a long lasting, premium product with proven reliability. In the last few months, several new corporate customers have adopted our sensor." Lokhorst went on to say that Tactex has appointed a west-coast sales representative for its bed sensor product line. "We are pleased to have Mr. Rich Kurczak represent us in Washington, Oregon, California, and Colorado. Rich has years of experience providing fall prevention solutions to the long term care facilities."

About Tactex

Tactex provides tactile sensor solutions for consumer products, medical, and industrial applications, as well as product development services to help clients realize their concepts. Tactex is publicly traded on the TSX Venture Exchange (TSX-V:TTX).
